Lanolin BP Grade

Chemical Name : **LANOLIN ANHYDROUS - PREMIUM FINE**

Specification-

1. Description Pale Yellow unctuous substance
2. Melting range 34° C to 44° C
3. Acid Value Not more than 1.0
4. Loss of drying at 105° C Not more than 0.5%
5. Saponification value 90 to 105
6. Peroxide value Not more than 20
7. Water absorption capacity Not less than 20 ml

Properties and Applications

Lanolin BP Grade is obtained from multi-stage refining of wool grease

Due to its emollient, high water absorption capacity and emulsifying properties, as well as having low chemical reactivity, it is widely used in cosmetics, toiletries and pharmaceutical preparations. It produces very stable water emulsions in oil, this characteristic has made it an essential component in excipients of pharmaceutical formulations.

STORAGE : Stored in a well closed container away from direct sunlight / heat.

PACKING : 50 Kg HDPE Sealed Container
